Allowable Subject Matter

1. Claims 1-9 are allowable over prior art.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on Applicant's Amendment filed on May 24, 2005.

As in claims 1 and 9, the prior art of record fails to teach or fairly suggest an Automatic Power Control part for monitored driving of a laser diode having the following features:

- (a) APC-turn off means for turning off the APC part so that the APC part stops monitored driving of the laser diode when it is determined that the recording speed exceeds a predetermined speed;
- (b) first OPC (Optimum Power Control) means for obtaining a first optimum writing power value by writing on an unused partition by driving an laser diode at a plurality of first test laser power values centered on a reference power value,
- (c) APC-turn on means for turning on the APC part so that the APC part resumes monitored driving of the laser diode after determining the first optimum writing power value when it is determined that the APC part has been turned off by the APC turn off means;

(d) second OPC (Optimum Power Control) means for obtaining a second optimum writing power value by writing on a subsequent unused partition by driving the laser diode at a plurality of second test laser power values centered on the first optimum writing power value; and

(e) reading out the information recorded on the subsequent unused partition and determining the second optimum writing power value.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any response to this action should be mailed to:
